

JLab EH&S Committee - June 2003 Highlights

As of June 30th, Jefferson Lab had achieved 45 consecutive days without a lost-time injury. The Lab record is 455 consecutive days without a lost-time injury.

The Training & Performance Office has purchased 2 videos to add to the Lab's safety-training media library. "Qualified Electrical Safety" focuses on work methods and safety considerations for line voltage systems. "I Chose to Look the Other Way" is a frank discussion of the importance (and challenges) of intervening when we see someone whose actions are putting them at risk. **(Administration)**

A tabletop exercise involving the Director's Command Staff is scheduled for July 14th. **(Administration)**

Preparations continue for the EM Peer Review that will be conducted August 6th and 7th. **(Administration)**

A June JLab injury was reported to the DOE as an "Off Normal" occurrence. The injury was a minor acid burn and did not involve lost or restricted workdays, the event was reported for its "near miss" aspects. **(EH&S Reporting)**

EH&S Reporting completed a literature review for lead surface contamination guidance. The review was conducted in support of a request from the Lab's EH&S Committee. The information was provided to Medical Services. **(EH&S Reporting)**

EH&S Reporting staff worked with key Facility Management staff and the head Smithfield Lawn landscaper to build a rain garden on June 3rd. Check it out by the North side of the EEL building! **(EH&S Reporting)**

EH&S Reporting and other Office of Assessment staff prepared and provided two training sessions on the new Oil Worker Training Class on June 24 and 26th. **(EH&S Reporting)**
